Summary

Technical professional transitioning into Cloud & IT Support, combining 6 years of enterprise client management experience with hands-on learning in AWS, Linux, networking, and frontend development. Experienced in troubleshooting customer issues, delivering technical training, and working with technical stakeholders. Currently preparing for AWS certification and building practical cloud infrastructure skills.

Experience

● 01/2024 – Present

Professional Development & Relocation

Germany

- Completed IT Infrastructure Foundations training at ReDI School, focused on networking, cloud infrastructure, and virtualization.
- Currently studying Cybersecurity at ReDI School.
- Earned the AWS Certified Cloud Practitioner certification.
- Developing skills in Linux, networking, and frontend development (React.js, JavaScript).
- Completed relocation and professional integration in Germany.

● 08/2023 - 01/2024

Frontend Developer

Hogarth Worldwide

- Gained hands-on exposure to React-based development workflows by supporting UI updates and component-level tasks.

● 07/2022 - 07/2023

Personal Career Development

- Focused on transitioning into web development through intensive self-study and project-based learning in computer science fundamentals, HTML, CSS, JavaScript, and React.
- Completed The Odin Project curriculum and developed practical coding skills through hands-on projects and GitHub-based coursework.
- Participated in coding bootcamps, workshops, and online training programs to strengthen frontend development and technical problem-solving skills.

● 05/2016 – 07/2022

Technical Sales Executive

Online Bilgi Hizmetleri

- Managed a large regional portfolio of enterprise clients, including universities, government institutions, and private organisations, delivering digital content and subscription-based solutions.
- Achieved \$150,000 in new sales revenue and maintained a 90% customer renewal rate through structured client management and data-driven follow-ups.
- Handled CRM-based workflows, including quotations, reporting, and tracking of customer interactions for internal and international stakeholders.
- Delivered product training sessions and technical presentations to clients, supporting the adoption of digital platforms and services.
- Collaborated with marketing and operations teams on product campaigns, system updates, and website SEO improvements.
- Acted as a key escalation point for client requests, resolving service issues and coordinating between users, internal and external partners.

Certificates

- AWS Certified Cloud Practitioner (CLF-C02) - 2026
- Google Data Analytics Professional Certificate - 2025
- The Complete Web Development Bootcamp - 2024
- JavaScript Algorithms and Data Structures - 2023
- Responsive Web Design - 2022
- Micro MBA - 2021

Hobbies

Running (5–10 km races)
Cooking (Italian & Turkish cuisine)
Reading and writing (developing a personal book project)

Driving License: B

- 10/2015 – 04/2016

Library Project Assistant

Istinye University

- 02/2015 – 08/2015

Military Service (Mandatory)

- 05/2010 – 12/2014

Digital Archivist

Doğan Media Group

- Managed digital video assets, including data entry, classification, and media database organization within enterprise content management systems.
- Supported internal teams by fulfilling media requests and maintaining structured archive workflows across departments.

Projects

→ AWS Static Website Deployment with CI/CD | AWS (S3, IAM), GitHub Actions, GitHub

AWS: <http://portfolio-bucket-cv.s3-website.eu-north-1.amazonaws.com/>

- Implemented a CI/CD pipeline to automatically deploy a static website from GitHub to Amazon S3.
- Configured IAM permissions for secure deployment and automated website updates using GitHub Actions.

→ E-commerce Website | React, JavaScript, HTML, CSS

GitHub: github.com/borakarayel/ecommerce

- Built a responsive e-commerce frontend using React, JavaScript, and CSS with a product catalog and navigation structure.
- Developed reusable UI components and implemented a structured product browsing experience across multiple devices.

→ How is the Weather? | JavaScript, HTML, CSS, Webpack

GitHub: github.com/borakarayel/weather-app

- Built a weather application using JavaScript and WeatherAPI, handling API requests, asynchronous data fetching, and dynamic UI updates.

Education

- 08/2022 – 07/2023

Full Stack Web Development Program

The Odin Project

- 09/2010 – 09/2016

Master's Degree – Information and Document Management

Istanbul University

- 09/2006 – 06/2010

Bachelor's Degree – Information and Document Management

Istanbul University
